DESIGN HIGHLIGHTS:

- Hammer to Drill a hole of dia 70 - 80 mm (2 3/4 - 3 15/99").
- ST25BR is a valve type hammer designed for high performance at low operating air pressures.
- BR2 bit has a strong robust design to with stand heavy duty application and it does not use foot valves which reduces the possibility of hammer failure.
- ST25BR Hammer maximizes energy output and reduces service requirements.
- Wear Sleeve is not reversible.
- Two Start threads on Top sub and Drive sub ensure easy coupling/un-coupling of hammer.
- All critical internal components are heat treated under strict control to maximize tool longevity.
- An overall cost-effective and user friendly tool for use in the most demanding conditions.

APPLICATIONS:

- Construction - Quarry

Figures are based on theoretical data

DESIGN HIGHLIGHTS:

- Hammer to Drill a hole of dia 127 - 152 mm (5" - 6")
- WIN500H is a valve type hammer designed for high performance at low operating air pressures.
- DHD350 bit has a strong robust design with Foot valve to withstand heavy duty application.
- WIN500H Hammer maximizes energy output and reduces service requirements.
- Wear Sleeve is not reversible.
- Three Start threads on Top sub and Drive sub ensure easy coupling/ uncoupling of hammer.
- All critical internal components are heat treated under strict control to maximize tool longevity.
- An overall cost-effective and user friendly tool for use in the most demanding conditions.

APPLICATIONS:

- Mining - Construction - Quarry

DRT SERIES

DRT80DH HAMMER

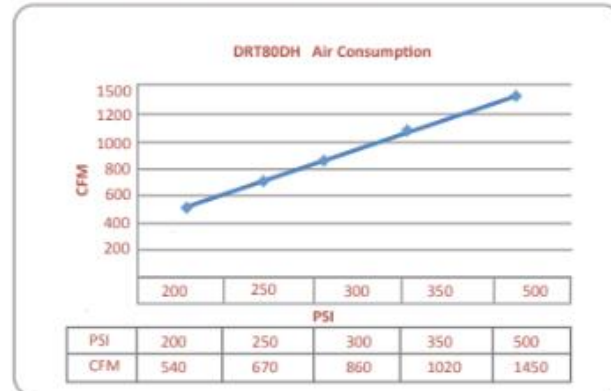

DESIGN HIGHLIGHTS:

- Hammer to Drill a hole of dia 200 - 254 mm (7 7/8" - 10").
- DRT80DH is a valve less type hammer designed for high performance at low operating air pressures.
- DHD380 bit has a strong robust design to withstand heavy duty application and it does not use foot valves which reduces the possibility of hammer failure.
- DRT80DH Hammer maximizes energy output and reduces service requirements.
- Wear sleeve is reversible.
- Two Start threads on Top sub and Drive sub ensure easy coupling/ uncoupling of hammer.
- All critical internal components are heat treated under strict control to maximize tool longevity.
- An overall cost-effective and user friendly tool for use in the most demanding conditions.

APPLICATIONS:

- Water Well • Mining • Construction • Quarry

Figures are based on theoretical data
